Globe Stamping Company Limited

CORPORATE PRINCIPLES

For ninety years, Globe Stamping Company Limited has been, and continues to be, absolutely committed to providing quality products, at competitive prices, delivered when required, and providing superior service to our clients.

We consider our staff to be the preeminent foundation for the successes we enjoy and we are focused on leading and directing them in a fair and equitable manner by developing and utilizing each individual's expertise and talents.

We emphasize job satisfaction, appropriate skill application and teamwork. We believe that, while all work is important and serious, a job should, and can be, rewarding and fun.

We operate on four basic priorities:

- 1/ Health and Safety
- 2/ Care of equipment
- 3/ Product quality
- 4/ Productivity

With each one contributing to the overall corporate goal and objective:

ABSOLUTE AND TOTAL CLIENT SATISFACTION.

Globe Stamping Company Limited

CORPORATE FACILITIES

Globe Stamping Company Limited has been established for over 90 years, servicing a wide client list and generating a variety of light, stamped metal products. Our Press Room is well equipped with an assortment of high-speed presses up to 200 tons, and also includes a press brake and metal fabrication capabilities.

We have our own tool design and fabrication facilities.

We operate an electroplating department, which includes barrel plating in nickel and zinc finishes, and have ready access to other local plating and metal finishers.

Our components assembly area is capable of performing numerous assembly functions.

Jigs and fixtures are largely designed and built in-house.

Our open line product line and our Corporate Heritage have focused on hardware components for the luggage, tool box and trunk manufacturers.

We also produce product for the home and office furniture industry, including furniture glides and other office product components.

Over the past number of years, we have been successfully active in providing custom and specialty stamped products, engineered and tooled for particular customer requirements.

Our principle focus is on small parts, generated in high volumes and working to close tolerances.

We provide quality products at competitive prices and focus on a high level of service to our client base.

We would invite your inquiries on any open line or custom stamped components which you may require.

PROVIDING QUALITY METAL STAMPINGS SINCE 1921.

EZ LIFT™ MODEL 2200B ADJUSTABLE SECONDARY WORK SURFACE MECHANISM

* Patented

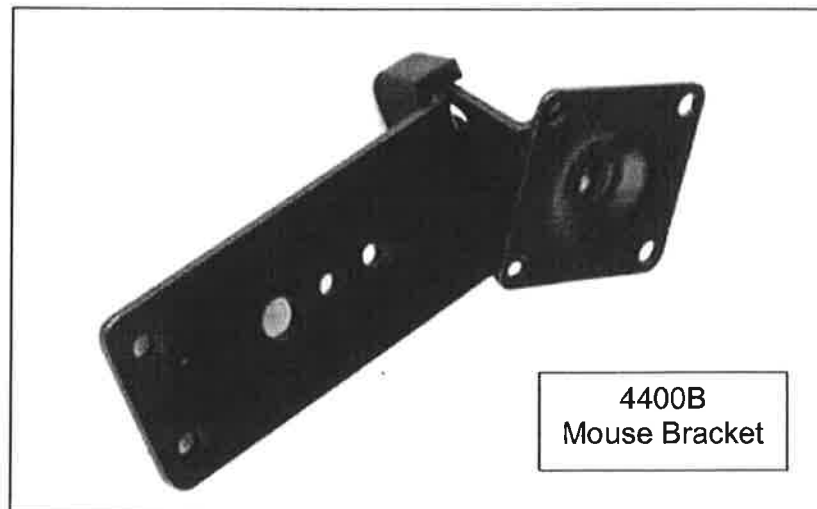

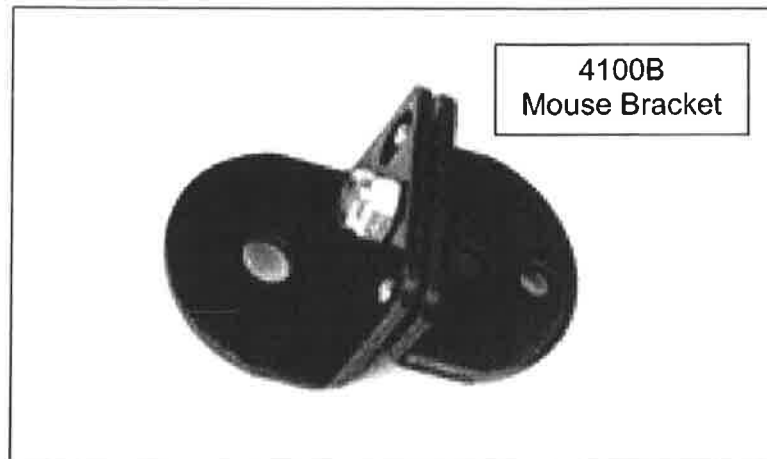

The EZ Lift™ © model EZ2200B* has an attractive low profile, smooth tubular design that hides all activation and linkage cables while eliminating pinch points during operation. This design allows knee clearance to be completely free of any obstructing components. The EZ Lift™ © has a single, intuitive squeeze paddle that adjusts height infinitely over a range of 8" above the work surface to 7" below the work surface satisfying the sit/stand needs of most users. This mechanism also features an infinite +/- 15° tilt range using a lever actuator. The EZ Lift™ © exceeds BIFMA load ratings for secondary work surfaces less than 48" in width and is available in a standard black textured powder painted finish.

3000 SERIES HANGING FILE BAR SYSTEM

The File Bar and Clip system come in varied lengths in order to "custom fit" for suitability to your application. The simple design and simple install procedure will make this the file bar of choice, and the pricing will be very attractive to the industry. Please call for details on specified lengths.

4000 SERIES MOUSE PAD BRACKETS

These brackets are used in conjunction with wood/laminate keyboard trays, which require a separate mouse tray. Our mouse brackets connect to the underside of the keyboard tray and the mouse tray and allow the mouse tray to swivel 360° while providing a +/- 15° mouse tray tilting range. Standard finish is black zinc chromate with clear zinc chromate being available as a special.

Globe Stamping Company Limited

CUSTOM STAMPING

Globe Stamping Company Limited is a premier designer and fabricator of custom, metal stampings with 90 years experience.

Globe Stamping Company Limited is a completely self-sustained operation. We have our own Tool & Die facilities, Stampings operations, Electroplating facilities, and Assembly capabilities on site. This allows us to be flexible in competing for your custom stampings requirements.

Globe Stamping has the ability to take a product design from concept to production and, in fact, in many instances recommend changes to the product that not only make it more economical to manufacture, but also improve the design quality of the end product.

Globe's in-house control of tooling design and fixture building ensure that tools are top quality and can be produced to our customer's specifications and expectations. Our CAD system is utilized for both part and tool design which greatly enhances the accuracy of product and communication with our clients.

We maintain low overhead and our goal is to provide quality product at cost effective pricing while focusing on our customer service.

Our presses range in size from 40 to 250 tons which allows for a large flexibility of product production. We also have hand feed operations and specialize in small, light metal stampings produced in high volumes to fill our market niche.

Globe Stamping takes a long-term view of all custom stampings and view our personnel to be the principle component in our success. We have been an active participant in the Tool & Die

Apprenticeship Program for over 65 years. We have received the Junior Achievement Award for KW, Kitchener-Waterloo Business Achievement Award and Heritage Award and participate in the Business Visitation Program for local area high schools and take a leading role in the annual Skills Canada Competition.

We are ISO Registered 9001:2008.

Should you have any custom requirements that you would like us to quote on, please do not hesitate to contact us. We would be happy to quote!
